TAMILARASAN R

QA Engineer | Manual Testing | API & Database Testing | Playwright (JavaScript) | AI-Assisted QA
+91 8122286890 | ta06448@gmail.com | linkedin.com/in/tamilarasan-r-qa | github.com/tamilarasan-qa | Bangalore, India | Immediate Joiner

PROFESSIONAL SUMMARY

QA Engineer with 4.5 years of experience testing a multi-tenant, product-based CMMS SaaS platform across web and mobile platforms. Experienced in functional, regression, integration and end-to-end testing, REST API validation with Postman, and backend validation using PostgreSQL and MongoDB. Strong in requirement analysis, test case design, defect lifecycle management, root cause analysis, release validation and Agile Scrum. Over 1 year of hands-on Playwright (JavaScript) project experience, including Page Object Model, cross-browser testing and GitHub Actions. Uses AI-assisted tools including Claude, ChatGPT and GitHub Copilot to support test design, edge-case identification and SQL/script debugging. Available for immediate joining.

TECHNICAL SKILLS

Manual & Functional Testing: Functional, Regression, Integration, System, Smoke, Sanity, Exploratory, End-to-End and User Acceptance Testing (UAT); Web and Mobile Application Testing (Android, iOS); Cross-Browser Testing; Risk-Based Testing

API Testing: Postman, REST APIs, HTTP Methods and Status Codes, Request/Response Validation, JSON and Schema Validation, OAuth 2.0 and Bearer Token Authentication, Positive and Negative Testing, CRUD Operations, Postman Collections

Database Testing: SQL, PostgreSQL, MongoDB, CRUD Validation, Aggregation Pipelines, Data Consistency and Backend Validation

Test Automation: Playwright with JavaScript, Playwright Test Runner, Locators and Assertions, Page Object Model (POM), Wait Handling, Cross-Browser Execution, Screenshot on Failure, HTML Reporting

Programming & Tools: JavaScript (ES6), Node.js, npm, Git, GitHub, GitHub Actions (CI/CD), Visual Studio Code, Jira

AI-Assisted QA & Agent Concepts: AI-assisted test case/scenario generation, requirement analysis, test data generation, bug analysis, test failure analysis, SQL/query generation, Playwright script generation, Jira defect drafting; familiarity with QA AI-agent workflows for requirement-to-test-case generation, API testing and regression analysis.

QA Process & Methodologies: Requirement Analysis, Test Planning and Strategy, Test Case Design, Requirement Traceability Matrix (RTM), Defect Lifecycle Management, Root Cause Analysis, Release Validation, Agile Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

Senior QA Engineer — Manual, API & Database Testing — Feb 2022 – Jun 2026

Daacoworks Technologies Pvt. Ltd. | Product-Based SaaS Company | Bangalore, India

Project: CMMS Platform (Multi-Tenant SaaS Product)

Environment: Web, Mobile, REST APIs, PostgreSQL, MongoDB, Agile Scrum, Jira, Git, GitHub

- Delivered end-to-end QA across multiple modules of a multi-tenant CMMS SaaS platform, supporting 12+ production releases for web and mobile products.
- Analyzed requirements, user stories and acceptance criteria to design test scenarios, test cases and regression suites.
- Designed and maintained 1,200+ test cases covering functional, regression, integration, smoke, sanity, UAT, cross-browser and end-to-end testing, mapped to requirements through RTM and achieving 95%+ requirement-level coverage.
- Verified 40+ end-to-end business workflow scenarios covering the complete work order lifecycle, contributing to zero P0 production defects over six consecutive months.
- Validated 60+ REST API endpoints using Postman, covering CRUD operations, OAuth 2.0/Bearer Token authentication, schema validation, status codes and negative testing.
- Cross-checked backend data using PostgreSQL and MongoDB queries to verify transactional accuracy, business rules and data consistency across 100+ business scenarios.
- Executed regression cycles, release validation, production smoke testing and deployment verification for 12+ production releases, supported by risk-based test planning and release readiness assessments.
- Conducted compatibility testing across 3 browsers (Chrome, Firefox, Edge), 2 mobile platforms (Android, iOS) and 2 desktop operating systems (Windows, macOS).
- Logged and tracked 150+ defects in Jira with reproduction steps, severity classification and root cause analysis, supporting faster resolution.
- Collaborated with developers and product owners on enterprise implementations, tenant-specific configurations and production issue investigation.

PLAYWRIGHT AUTOMATION (JAVASCRIPT) — HANDS-ON PROJECT WORK

1+ year of hands-on project work | GitHub: github.com/tamilarasan-qa

- Built a JavaScript Playwright framework using Page Object Model (POM), reusable page objects, ES6 test data utilities and configuration management.
- Automated 25+ regression scenarios across 5 workflow areas (Login, Dashboard, User Management, Search and Form Submission) using locators and assertions.
- Executed the suite across Chromium, Firefox and WebKit with wait handling, screenshot-on-failure capture and HTML reporting.
- Managed code with Git/GitHub and configured GitHub Actions to run the regression suite automatically.

OTHER QA PROJECTS

- **API Testing with Postman:** REST API collections covering CRUD operations, authentication, environment variables and response validation.
- **Database Validation Repository:** SQL and MongoDB CRUD, aggregation pipelines, indexing, lookups and query validation exercises.
- **QA Portfolio & Manual Testing Repository:** Sample test cases, bug reports, RTM, test plans, regression checklists and release validation documents.

DOMAIN EXPERIENCE

CMMS | Multi-Tenant SaaS Applications | Asset Lifecycle Management | Preventive Maintenance | Workflow Management | Role-Based Access Control | Reporting & Analytics | Client Customization

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

MGR Arts and Science College, Periyar University | Jun 2018 – May 2021
